I know about the Ripvius software but it's not that easy. If you use it you need to re-purchase the code for each new version and it's like 2 to 3 weeks per version that you want to update. A: I recently heard about a company that creates patches for software and fixes all kinds of problems, including these. Have you tried their license? For the two of you who like to see what I have come up with - here is a new program that is not 100% ready yet but I have been testing it out with success. It is very similar to Vista Buttons (especially with the tab to switch between the different options) but I added a few extra features. I have made it as easy as possible to create web buttons, so that anyone who has never made buttons before will be able to use it with ease. I have also added a few other features that people have requested, so it has been fun coming up with some. Vista Buttons 5.7.5 - Make 2 or more items under a single folder link. With Vista Buttons 5.7 you can make one or more items under a folder link, or go the other way and make a folder link and one or more items under it.
