May be shown with print purchase. If not shown, then it is in print and we recommend that you order it. Q: How to create string variable in the loop? I'm going through chapter 7 and this was my task: (define (new-prefix n) (string-append "prefix-" n)) (define (build-book) (define (peek n) (if (= n 0) '() (cons (new-prefix (sub1 n)) (peek (- n 1))))) (define (do-book) (for-each peek (read-line))) (define (end-book) '()) (define (write-book s) (print (append (read-lines s) (end-book)))) (define (read-lines s) (for-each (lambda (l) (append l (read-char))) (string-append s " "))) (define (print l) (display l)) (do-book) (write-book (read-lines "Book title here"))) (define (main) (build-book)) When I try to run it, it gets errors and tells me that "for-each doesn't exist in the context". I can't find any examples online and I'm just starting to learn Scheme. A: Syntax error is here: (define (print l) (display l)) (define (read-lines s) (for-each (lambda (l) (append l (read-char))) (string-append s " "))) Change it to:

Dasavathaaram is a 2008 Indian Tamil-language sci-fi action film directed by K. The film has also been released in Telugu, Hindi, Malayalam, . Description: Indian science fiction film about.
