A: Change the value in Surl and Sfile to whatever you need. Here I have changed the value of Surl to test.txt Sfile = ""; Surl = "" Sfile; Q: how to use 'my friends' and 'other friends' in facebook graph api I want to get my friends list using the facebook graph api. I found the way to do it. But it's the following steps: Step 1: Visit the friends tab and right click on a user. Step 2: Choose 'See the person's connections on facebook.com' and click OK. Step 3: Enter a friend name in the search box and click 'Look Up'. But when I do that, it only shows me 'my friends'. I want to show both 'my friends' and 'other friends'. How can I do that? A: By default, the API uses a query parameter to limit the set of friends returned in the response, but the friends tab for the user is a different query parameter. To combine the two, use both of the following: If you want to get all of the friends for the user as well as other friends, get the friends list for the user by supplying the user's access token. If you want to get all of the friends for the user and not only friends that are also friends of the user, get the friends of the user by supplying the user's access token. For more details, see Episcopal Diocese of Ohio The Episcopal Diocese of Ohio is an Episcopal diocese located in the U.S. state of Ohio. It is a diocese in Province II of the Episcopal Church in the United States of America and includes all of the states of Ohio, Indiana, Illinois, Michigan, Kentucky, Wisconsin, and West Virginia as well as part of the state of New York. The Episcopal Diocese of Ohio has three suffr
