There are several ways of upgrading Office 2007 to Office 2007 Service Pack 1. You can download and run the standalone service pack installer, which installs a copy of the Service Pack in C:\Program Files\Microsoft Office\Office12\, and registers the new product. If you're upgrading Office 2007 Enterprise SP1 and want to use the OSR, the standalone SP1 installer does not work. Download and run the standalone setup from Microsoft directly.

This is the recommended method of installing Office 2007 Service Pack 1, and the installer can also perform Office 2007 Enterprise SP1 OSR if you're running it.
