Earthquake in Southern Italy A 1.9 Richter magnitude earthquake occurred at 7:14PM GMT on January 17, at a depth of 18 kilometers. According to the earthquake's web page, no casualties were reported and damage was limited. The Associated Press writes that “a powerful earthquake rattled the southern Italian region of Calabria and rocked the streets of Rome and other large cities, injuring at least one person, cracking the façades of some buildings, toppling a wedding marquee and shaking bars, nightclubs and offices, officials said.” The

head of Italy's earthquake agency said the earthquake had a magnitude of 1.9, which was revised downward from the original 2.0.

**Q:** Using webservices to call another webservice in Java I have a question regarding webservices. First of all, I know that webservices are basically just a small website. I have an application that I am currently developing that needs to call another webservice everytime the app is launched. I am going to be calling the same webservice multiple times and want to save some time by just calling it once every time the app is launched. What is the best way of doing this?

**A:** A simple way would be to have the main webservice return a URL
