As this is the portable version of the program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to use a countdown timer for shutting down your computer on the breeze, without having to go through installation steps. It sports a clean and simplistic layout that allows you to set up the dedicated parameters with minimum effort. The program gives you the possibility to specify the time (in hours and seconds) and select the desired mode (e.g. shutdown, reboot, logoff). As soon as you configure the aforementioned parameters, Portable Simple Shutdown Timer automatically counts down the time until it shuts down your PC. Additionally, you are allowed to stop the process with a single click. The lack of configurable settings can be good news only for beginners, as they can learn to master the entire process with minimum effort. However, more experienced users may find it pretty inconvenient to work with a tool that doesn't offer support for advanced functions. You cannot schedule an event for making the utility close or run a certain program, turn off the computer at a user-defined time, and run the tool at Windows startup. During our testing we have noticed that Portable Simple Shutdown Timer carries out a task very quickly, and no errors showed up throughout the entire process. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. All in all,
