

[6] The other is Computational Physics by Mark Newman.[9] The official Python website is at www.python.org and it always has up-to-date documentation - ... but you can read it too. I won't even pretend that I know how you're going to use Python without reading this website. If you decide that I convinced you, then I sincerely envy you. This is a very pleasant way to spend a lot of time. (As opposed to how long it took me to find all my libraries.) But when you start programming, it becomes obvious that you can't just start and use a website for an initial workout.
