Flight Sim World V2.0.16312 Crack

we have developed a highly encrypted WiFi draft of SIM World V2 in our office for our users in Hong Kong, that would be ready for release after 1st August 2016. Please download it today and you will have a chance to get it in time. ☺ Thank you for your continuous support, we would love for you to have it. ☺ How it works: Anyone who has access to the draft can have a trial (no purchase needed) until the main launch of our client version in August 2016. Note that everyone who has a local copy of SIM World v2 will be able to experience the draft prior to the main release. (As long as they are at least in the beta-testing phase at the time of the main release.) Limitations: Only one SIM world v2 client at a time will work on a machine (trial versions are linked to the existing SIM world v2 client version to avoid double work). The current draft and accompanying pack can only be used with SIM world v2 client. As some of our users may be concerned about a possible patch/update for the SIM world v2 client on Windows which may see a lot of circulation between Aug 2016 and Feb 2017. (By Feb 2017, the Windows client may be unstable.) We apologize for any inconvenience caused by the patch. SIM World does not require patches and no updates will be made to the client (on Windows, iOS or Mac) in 2017 for those who download the initial client. Any inquiries about the draft can be directed to mx_simworld@yahoo.com. Please do not hesitate to ask if you have any questions. By the way, we are grateful to have had an amazing response from most of our users (which is especially to those who shared the news on social media and Youtube channels). Please do not hesitate to visit our Youtube channel and WhatsApp Channel to receive updates:
