After a night of sleeping in a smoky home, the first thing most people think about is whether or not to check for fire damage. While it is tempting to panic and rush to the nearest fire station and do so immediately, it's best to seek professional assistance first. This is when it is best to consult a house fire restoration company, who know the ins and outs of the home inspection process and can identify any hidden fire damage that may have been caused by a previous fire. Your house fire insurance should cover home fire restoration services. According to the Insurance Institute of Canada (IIC), you'll be entitled to get up to \$40,000.00 in home fire restoration services.
