Any DWG and DXF to PDF Converter is an advanced program with intuitive options dedicated to converting AutoCAD drawing files with the DWG, DXF and DWF format to PDF documents. Easy setup and GUI After a fast setup procedure that shouldn't give you any trouble, you're welcomed by a user-friendly interface which consists of a standard window with a well-structured layout, where you can get started by adding AutoCAD files to the task list. These can be added from separate disk locations using the file browser, or imported from selected directories using the tree view. It's also possible to filter all files from a folder, in order to add only DWG or only DXF files. Thanks to the fact that batch processing is supported, you can convert as any files as you want at the same time. Customize various PDF preferences Apart from the fact that you can specify the PDF destination, it's possible to customize the PDF size, colors and quality, generate one PDF for each layout or for each drawing, merge multiple drawings into a single PDF, as well as to replace the original files or create new ones when encountering same name conflicts. Moreover, you can integrate support for SHX and XRef by indicating SHX font directories, create the output layout using all paper spaces, all

layouts, specific layout names or the model space, and change the line width from default to a custom value ranging from 1 to 100.
