A comprehensive acronym & abbreviation search engine that helps you to find the acronyms and expansions associated with your search term. With its reverse lookup facility, AcronymGenie shows the abbreviations or acronyms associated with your search term. The database checkup tool checks the installed database for any damage or corruption. You can also configure it to run

automatically every time Windows starts. Simply type the first few letters of the acronym or abbreviation you are looking for. As you type in the letters, the list of abbreviations will narrow down to a more specific list. Once the acronym you are searching for appears in the list, you can double-click on the acronym to view its relevant expansion. Multiple expansions have been provided wherever applicable. AcronymGenie

Features: It is a fast acronym search engine with user friendly interface. AcronymGenie supports multiple languages for its international users. It helps you to search for acronyms and expandations across the multiple data fields like Contacts, Emails, Dictionaries and so on. It is a lightweight acronym search engine and does not take much of your system resources. You can easily configure it to run automatically every time

Windows starts. Simply type the first few letters of the acronym or abbreviation you are looking for. As you type in the letters, the list of abbreviations will narrow down to a more specific list. Once the acronym you are searching for appears in the list, you can double-click on the acronym to view its relevant expansion. Multiple expansions have been provided wherever applicable. The setup file comes with fully functional

installer and uninstaller. AcronymGenie takes up a surprisingly small amount of disk space and consumes very little of your system resources. Launch it anytime for a quick reference and it sits quietly on the system tray. It is easy, simple and a must for every desktop. What's New Version 3.8.5 (2007-05-23) A new feature has been introduced in this release. Now, it is possible to filter the search results by changing the options

available in'search type' tab. The existing filter settings are also retained as default settings. You can now configure AcronymGenie to autmatically scan the Contact List, Email List, Database, Dictionaries and so on for its new entries. For this purpose, new configuration options have been provided in the setting window. The database check
